**The New Miller Everbearer**

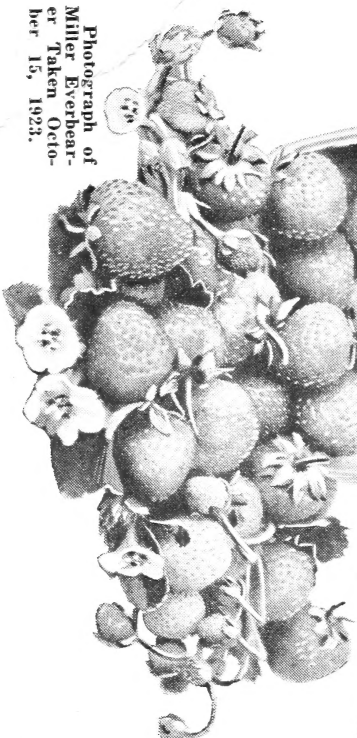

This splendid everbearer needs no introduction to a great many people in Holmes and Wayne Counties, and especially those who have seen it fruiting. It is considered by our State Horticultural authorities the greatest berry of this kind ever originated. It has been tested at the Ohio Agricultural Experimental Station and in my fields with practically all the everbearers, and has shown superiority over all. The fruit is large, of extraordinary quality and has a very attractive appearance.

This berry was originated by D. J. Miller, Millersburgh, Ohio, and is his pride and accomplishment of over fifty years growing and experimenting with Strawberries. I have purchased the exclusive rights from the owner and originator for my trade, and believe that everyone that gets started with this variety, will grow no others. As a June variety it ranks with the best.

The supply of these plants is very limited, and no plants will be offered before September 1st, 1925. These plants will be pot grown so as to be sure to grow. Orders will be accepted subject to crop. **Price, \$2.50 per dozen; not over a dozen to a customer.**

St. Martins. (A fine new variety) ...	.75	2.00	....	....
Perfection Everbearer .....	.75	2.00	....	....

Kellogg's Delicious, Kellogg's Marvel, President Harding and Kellogg's Big Wonder, fruited for the first time on my place last season, and owing to the wet weather conditions under which they were tested, I cannot recommend these varieties and offer plants at the \$6.00 per 1000 rate for those who wish to try them out.

**YOUR SUCCESS** depends upon the quality of the plants. They must be strong, healthy, fresh dug, packed properly and immediately shipped. Every order which leaves my plant farm has individual attention and reaches the customer in the quickest possible way.

**HOW TO ORDER.** Place your order now. If you wish you can remit at planting time. This will enable me to reserve your varieties. As the old saying goes, "Don't get the cart before the horse." When you are ready for your plants, just send a letter stating when to ship, inclosing remittance, and your plants will be shipped as desired.

**PLANTS BY MAIL.** Most of the varieties listed will average around 50 pounds to 1000 plants, being almost double the weight of ordinary nursery grown plants. If plants are wanted by parcel post, please add 10c per 100 plants to your order; any surplus postage will be refunded.

**GUARANTEE.** All the above varieties have fruited on my strawberry farm and are true to name and free from disease; also state inspected. If, upon arrival, these plants do not come up to your expectations, ship them back at my expense and I will gladly refund your money.
